TECHNICAL SKILLS

Programming Languages: Python, C, C++, HTML, CSS, JS, SQL/MySQL, Java, Verilog, Typescript

Libraries: Vercel, Qt, Flask, Unix, Intel Quartus Prime, FPGA, Django, Figma, Firebase

PROJECTS

UKNOW | Python, HTML, CSS, JS + Django, mySQL | Fullstack

Jan 2026 – April 2026

- Developed a website that gives statistical insights on university admissions filtered by user input from an SQL database, implemented with an API utilizing keyword search to return sets of data from a parsed CSV dataset of 4000+ rows
- Built a scraper to scrap data over spreadsheets and several websites with university data, accumulating over 15000+ rows of accurate program descriptions and program names
- Created the project with the SDLC in mind, and organized the project over a Scrum framework with other developers over a 1-week sprint time across an estimation of 5 sprints for the minimum viable product
- Engineered a modern AI-free webpage design utilizing Figma for concept designs and HTML + CSS for an accurate implementation, whilst keeping the frontend responsive and user-friendly for use

SkyblockFlips | Python + Qt | Fullstack

Dec 2025

- Developed a data-driven app utilizing SkyApi to analyze in-game data and identify profitable item resells up to 150% profit in the game Hypixel Skyblock, which is then displayed over a responsive GUI with clean and re-sizable layouts
- Integrated and coordinated multiple API endpoints to cross-reference data and find the most profitable flip possible
- Implemented pre-filters for large JSON datasets in combination with other APIs to rule out over 40 sets of invalid data

WeatherSite | Python, HTML, CSS, Flask | Fullstack

Jan 2026

- Built a multi-page website with OpenWeatherMap APIs to transfer weather data onto a clean, modern user interface
- Displays real-time temperature and conditions for user-specified cities with auto-complete detection over 200,000 cities
- Implemented cookie-based tracking of previous searches and robust error handling to improve user experience

EXPERIENCE

Lawrence Heights Community Centre

Ontario, Canada

Volunteer

May 2024 – June 2025

- Demonstrated reliability and effective time management by working extended consecutive volunteer shifts
- Collaborated with staff and volunteers on multiple tasks, including managing local events and volunteering in multiple locations, strengthening communication and teamwork skills

ACHIEVEMENTS

- Ranked **2nd** locally on the 2024 Avogadro's Exam

EDUCATION

University of Waterloo

Ontario, Canada

Bachelor of Software Engineering (Honours)

Expected graduation: 2030
